

Come In Person or Join Online

We're full steam ahead for our [LIVE event](#) in New York City, October 7-9, 2021, for the 5th International Workshop on the Biology, Prevention and Treatment of Relapse After Hematopoietic Stem Cell Transplant and Cellular Therapies.

After a year of social distancing, it's time to get out and enjoy dynamic discussions again! Meet up in New York City with other people who are working to treat and prevent relapse after HSCT. (Travel grants available, reach out for more information hsctconference@mocandco.com)

[Submit your Relapse After HSCT² Abstract](#), the deadline has been extended to September 15, 2021

Please be prepared to show your COVID vaccination card, otherwise please join in virtually. **We've enhanced the event to include a virtual option** so that our international colleagues and those unable to travel can participate in the workshop.

Tremendous Progress

Since our 1st relapse meeting, we now have more options to help people, including:

- 3 new drugs approved to prevent disease recurrence post autologous transplant
- FLT3 inhibitors and other TKIs to prevent relapse post allogeneic HCT
- CD 19 CAR T cell therapy for patients with disease relapsing after HCT

Be part of the new discoveries October 7-9, 2021, at the Relapse After HSCT² 2021 Workshop.
