

CONSULTANT PAEDIATRIC HAEMATOLOGIST

April 2022

Values and Behaviours

1. **Patients** - We will ensure our patients receive consistently high quality, safe care with outstanding outcomes and experience
2. **People** - We will build on our position as an employer of choice; with an engaged, developed and empowered team that puts patient care at the heart of everything it does
3. **Places** - We will invest in our estate, equipment and digital infrastructure to support the delivery of high quality patient care
4. **Performance** - We will consistently achieve our performance standards and make the best use of resources to contribute to an affordable healthcare system
5. **Partners** - We will support the improvement of the health of the communities we serve through strong system leadership and innovative partnerships to deliver integrated models of care
6. **Potential** - We will deliver world-class research and education and transform health through innovation

Our TEAM NUH values are:

TRUST

We build trust with our patients and staff through our kindness, compassion and care

EMPOWERING

We empower people to be innovative and creative in their work and make positive choices that support healthier lifestyles

AMBITIOUS

We celebrate and recognise our staff and aspire to be known for clinical excellence and outstanding patient care

MINDFUL

We value everyone's contribution, take pride in our inclusivity and diversity, make best use of the resources entrusted to us and always make time for people

NURTURING

We encourage all our teams to be the best they can be through continuous learning, education, research and feedback

UNITED

We pull together as one team and aspire to be a valued partner in the wider health and social care system

HONEST

We're open, fair and honest in all we do and have the courage to speak up

1 THE POST

Full-time Consultant Paediatric Haematologist for Nottingham University Hospitals NHS Trust.

Nottingham Children's Hospital is looking to recruit a full-time, substantive Consultant Paediatric Haematologist with a responsibility for malignant and non-malignant paediatric haematology patients under the care of Nottingham University Hospitals NHS Trust. This is a

replacement post. The successful candidate will be one of three consultants with responsibility for paediatric haematology care in a 7 person Consultant Team providing the regional Paediatric Oncology and Haematology Services at Nottingham Children's Hospital.

The post is based at the Queens Medical Centre Campus of NUH. The appointee will be employed in the Family Health Directorate whilst working within the Haematology Laboratories at the QMC Campus. The post holder will be managerially responsible to the East Midlands Children's and Young Person's Integrated Cancer Service (EMCYPICS) Service Director and the Clinical Director for Nottingham Children's Hospital, who is currently Dr Sophie Wilne.

The post holder will be responsible for the care of children and young people with leukaemia as well as non-malignant haematological disorders. Each of the 3 consultants will be the lead for one of the key components of the paediatric haematology service (leukaemia, haemoglobinopathy and bleeding disorders). Depending on the interests of the appointee there is the option for them to be the lead for either leukaemia or bleeding disorders. The appointee will be the named consultant for an appropriate proportion of patients with leukaemia, bleeding disorders and general haematological disorders. Along with the other paediatric haematologists, the post-holder will provide paediatric haematology advice to other teams within the children's hospital. They will also provide regional paediatric haematology advice to paediatricians as well as advice to local GPs.

The post is full time and has 10 PAs in the job plan, although applications will be considered from applicants wishing to work less than full time. The on call commitment to the Paediatric haemato-oncology service will be 1:6 nights and weekends with prospective cover. The Paediatric Haematologists are responsible for the laboratory support and advice on all paediatric investigations during normal working hours. There is no additional on-call for the laboratory on top of the 1:6 rota.

2 THE SPECIALTY

The East Midlands Children's and Young Person's Integrated Cancer Service (EMCYPICS)

EMCYPICS was established in 2010 and provides a tertiary service for the treatment of children with cancer within the East Midlands.

- The Co-ordinating Centre at Nottingham Children's Hospital manages the patient journey, in close consultation with lead clinicians.
- Core, definitive diagnostic investigations and therapeutic surgery is centred at NUH.
- Patients receive highly complex chemotherapy* at Nottingham Children's Hospital with complex chemotherapy, including high dose methotrexate, being delivered at both Nottingham Children's Hospital and Leicester Children's Hospital
- The radiotherapy service for the East Midlands is provided at Nottingham City Hospital campus of NUH.
- Clinicians from Nottingham Children's Hospital and Leicester Children's Hospital work together as part of the EMCYPICS.
- Patients are transferred back to more local care settings as soon as clinically desirable and in line with patient choice.
- There are level B enhanced shared care services at Northampton General Hospital and standard level shared care services at United Hospitals of Lincoln, Lincoln and Boston Hospitals.

- There is an established transition pathway and late effects service.

*Highly complex chemotherapy includes intensive myelosuppressive, immune-compromising therapy that is likely to render the patient neutropenic for more than 2 weeks. Currently this includes therapy for Acute Myeloid Leukaemia and High Dose Chemotherapy / Stem cell Harvest and Rescue

Malignant Haematology/Oncology at Nottingham Children's Hospital

At NUH children with leukaemia are under the care of the Consultant Haematologists and those with solid tumours are under the care of the Consultant Oncologists. The paediatric oncology and haematology service at Nottingham Children's Hospital cares for patients with all haematological malignancies and required treatments, apart from allogeneic stem cell transplants, all solid tumours, CNS tumours and the initial work up of children with non-malignant diagnoses initially thought to be malignant. Children with Retinoblastoma and primary bone tumours have biopsy, strategic management, and definitive surgery at supra-regional units but all chemotherapy and local support for these patients is managed within Nottingham Children's Hospital.

Our aim is to ensure that all eligible patients will enter clinical trials. Our clinical Trials portfolio is managed by our research nurses with considerable care and attention spent in ensuring trial protocols are kept current and up to date.

E39 is our primary designated Paediatric Oncology/Haematology ward and has 15 bed spaces. E40 is our Neurosciences ward and has 16 beds. These newly refurbished wards re-opened early in 2015. The refurbishment project included the development of a Teenage Cancer Trust Unit on E39.

Patients requiring allografts are referred to Sheffield Children's Hospital. Patients requiring high dose chemotherapy with stem cell rescue currently go to Sheffield Children's Hospital for their harvests and returns. Children are transferred back to Nottingham for ongoing inpatient care following stem cell return.

Haemostasis and Thrombosis

The Paediatric Haemophilia Service sits within the Nottingham University Hospitals Haemophilia Comprehensive Care Centre under the directorship of Dr Charlotte Grimley. The specialist Haemostasis diagnostic laboratory is at Queens Medical Centre. There are 3.4 WTE clinical nurse specialists for haemophilia providing cover for both adults and children. The Haemophilia Specialist Nurses know all the families and support patient centred and timely transition to the adult clinical service. There are a small but growing number of children on anti-coagulant therapy and a regular requirement for consultative haemostasis/thrombosis advice to the Paediatric Intensive Care Unit, the Renal Unit and the Neonatal Units. There is a 24 hour Consultant on-call rota for haemostasis which is part of the cover provided by the consultant adult haematologist on-call for non-malignant haematology.

Haemoglobinopathies

Nottingham University Hospital Trust was commissioned as a Specialist Haemoglobinopathies Team (SHT) in January 2020. Nottingham university Hospital Trust is part of East Midlands sickle and Thalassemia network (EMSTN) and the haemoglobinopathy team work closely with its Haemoglobinopathy coordinating centre (HCC).

The paediatric haematologists in Nottingham provide a service for haemoglobinopathy patients in the North of the East Midlands region. There is a 0.7 WTE clinical nurse specialist for paediatric haemoglobinopathy. The service meets national standards for haemoglobinopathy care.

The Laboratory Service

The laboratory services of the two Nottingham University Hospital Trust sites merged in 2006 to create a blood sciences service. This includes Clinical Chemistry, Haematology, Blood Transfusion and Immunology. There is a single management structure to cover all specialities and sites. This has been facilitated by the introduction of a single Pathology Laboratory Information System (WinPath). Other enablers of the merger include the use of the Q-Pulse quality management and document control system. The laboratory is CPA accredited. Specialist areas include:

- Antenatal Haemoglobinopathy screening which handles 10,000 samples per year.
- Antenatal screening service
- Advanced Coagulation reference laboratory to support the Thrombophilia and Haemophilia services.
- Links to Molecular diagnostics and genetics
- HMDS service providing an immunophenotyping service for paediatric malignant haematology.

The Consultant Paediatric Haematologists are responsible for the laboratory reporting of paediatric bone marrows and take an advisory role in the reporting of paediatric blood films and cytopins. The post holder is managerially responsible to the Clinical Director of Pathology for these laboratory functions.

Research

Research is actively encouraged and there is an active programme of clinical and non-clinical research within the department. The post holder is expected to participate in relevant trial related research groups and organisations. We aim to treat all eligible children with leukaemia on clinical trials. The appointee would be expected to take on the role of Principal Investigator for a proportion of the haematology trials.

Billy's House

We are in the very fortunate position to be able to provide a 'home from home' environment for children with cancer being treated at the EMCYPICS. Billy's House in part mitigates against the inevitable disruption to family life following the diagnosis and treatment of a life threatening illness. The development of Billy's House has been a joint venture between parents, led by Laura Greenhall, and Young Lives vs Cancer.

Social Service Support:

There is a team of Young Lives vs Cancer Social Workers based in the Children's Hospital providing social support for families.

Nottingham Children's Hospital

Nottingham Children's Hospital provides a comprehensive range of specialist services for children in Nottingham, together with tertiary paediatric and neonatal services to the adjacent areas of Lincolnshire, Derbyshire and North Nottinghamshire in the Midlands and neurosurgical services for Leicestershire. We also provide supra-regional services for

paediatric spinal surgery, rheumatology, nephro-urology and cystic fibrosis. Paediatric cardiac surgery and hepato-biliary surgery are not resourced locally.

The Childrens Hospital is situated in East Block on D and E floors, with out-patient departments on B floor and within the community setting and comprises:

- Eight wards - 121 Beds, including critical care
- Critical care unit – 14 beds from Jan 2015
- An Oncology Day Case Unit with anaesthetic facilities,
- A Short Stay unit for observation of the acutely ill child
- A large Hospital school.
- The Academic Division of Child Health (University of Nottingham School of Human Development).
- A 22-bedded Neonatal Intensive Care Unit (situated on B floor adjacent to the delivery suite)
- 2 outpatient areas on B Floor, South and East
- Community Paediatric outpatient and administrative bases at 14 locality based health centres
- Outpatient and administrative bases at the Child Development Centre, Nottingham City Hospital Campus.
- The East Midlands Children and Young Peoples Sexual Assault Service is situated in South Block, A Floor.

Teaching

Both main campuses of the Trust are major centres for undergraduate and postgraduate education and teaching. The successful candidate will be expected to undertake undergraduate teaching and this is scheduled in the job plan.

Research

The Trust has extremely close links with Nottingham University, and has academic departments in the majority of its clinical specialties. There are University and Trust research facilities. The Trust has a research strategy and management framework which aligns its funding for research with the research and innovations activities it supports.

P3 JOB PLAN & TIMETABLE

The following draft Job Plan reflects our best assessment of what the final plan will be, based on 10 PAs.

Any consultant who is unable, for personal reasons, to work full-time will be eligible to be considered for the post on a part-time basis; if such a person is appointed, modification of the job content will be discussed on a personal basis with the Trust in consultation with consultant colleagues.

This service provided by Paediatric Haematology is provided at the Queens Medical Centre Campus. There will be very occasional duties at the city campus. The post holder will be expected to maintain and regularly update their practical skills in bone marrow biopsy and the administration of intrathecal cytotoxic chemotherapy as defined by NUH Trust Policy on the Administration of intrathecal Chemotherapy.

The proposed Job Plan is detailed in this job description.

TIMETABLE

DAY	AM	PM
Monday	Multiprofessional ward round meeting Clinical review of share of inpatients (1 in 2) Admin related to patient care Weekly departmental consultant meeting	Admin related to patient care Service week: review of new/unwell patients Other weeks: Malignant haematology clinic
Tuesday	Laboratory session Service week: Board Round and handover and review of unwell patients Admin related to patient care	Core SPA Half day off 1 week in 6
Wednesday	Core SPA or Supervision of bone marrow and LP list 1 in 6 Haemophilia MDT and admin Board round, patient review and handover with chemo planning meeting 1 in 6 SPA – trial activity	Leukaemia MDT Leukaemia maintenance clinic 1 in 3 or admin related to patient care
Thursday	Non malignant haematology clinic Board round, sick patient review and handover on service 1 in 6	Departmental meeting Diagnostic and treatment conversations with families Educational supervisor role Grand round
Friday	Multi-professional ward round Clinical review of share of inpatients and handover 1 in 2 Admin related to patient care	Non-service weeks: Weekly half day Service week 1 in 6: Review of unwell patients/treatment conversations

The on-call commitment is currently 1:6 supported by Junior staff.

This post is deemed to be in Category A and an allowance is paid for being on-call, which is currently 5 %.

4 DUTIES

The appointee will be expected to fulfil the following duties with the agreed Job Plan.

Clinical

A full range of paediatric haematology emergency and elective patients are admitted to Nottingham University Hospitals NHS Trust and the appointee will be responsible for the management of those patients admitted under his/her care.

Provision with Consultant colleagues of a comprehensive elective and emergency haematology service.

Provision of reciprocal cover for periods of leave.

Continuing responsibility for the care of patients in his/her charge and the proper functioning of the department.

The appointee will be required to advise on the management of those children with haematological problems admitted under the care of other colleagues within the unit. We presently provide service week Consultant cover for the management of those children with

Cancer and benign haematological problems admitted under the care of other colleagues within the unit. The post holder will be expected to provide service week cover. The roles of the service week consultant include being the first point of contact for the junior doctors regarding inpatients, doing a board round at least once daily, reviewing any sick patients on the ward requiring senior review, prioritising admissions, and accepting referrals of patients with a suspected diagnosis of cancer. The service week consultant also provides consultant support to the day care unit which includes providing support for the registrar doing the general anaesthetic list for bone marrow aspirates/trephines and lumbar punctures and covering the list when needed. The full-time consultants provide service week cover 1 week in 6.

The appointee will be expected to provide regional advice to general paediatricians, neonatologists and other paediatric specialists and advice and guidance to local GPs.

It is expected that the post holder will become a key member of the Multidisciplinary clinical and Psycho social teams.

The Haemophilia Comprehensive Care Centre and the Haemoglobinopathy Service are subject to Peer Review. It is expected that the post holder will play their role in enabling the service to meet national standards.

These duties are subject to review from time to time in the light of the changing requirements of the service. If alterations to the described duties are required these will be mutually agreed between the appointee, their consultant colleagues, and the Trust. The appointee will provide reciprocal cover for annual, and study leave and short-term remunerated cover for sick leave.

The person appointed will be required to devote substantially the whole of their time to the duties of the post and always give them priority.

These duties are subject to review from time to time in the light of the changing requirements of the service. If alterations to the described duties are required these will be mutually agreed between the appointee, his/her Consultant colleagues, and the Trust.

The person appointed will be required to devote substantially the whole of his/her time to the duties of the post and give them priority at all times.

Governance and Audit

Each consultant is expected to take an active role in clinical governance activities including (but not restricted to) clinical audit, incident reporting, review of complaints, risk management, CPD and Evidence-Based Practice. Each directorate has a Consultant Clinical Governance lead. . The study leave allowance is 30 days over 3 years and study leave funding is available.

Teaching

Both main campuses of the Trust are major centres for undergraduate and postgraduate education and teaching. The successful candidate will be expected to play a significant role in undergraduate and postgraduate teaching.

The Trust works to ensure the best possible placements and training for both undergraduates and junior doctors and to ensure consultant trainers & teachers are developed and supported. The Trust facilitates this through agreeing appropriate job plans, a clear framework for the delivery of medical education, and the opportunity to enhance clinical and teaching skills through Continuing Professional Development.

Research

The Trust has extremely close links with Nottingham University, and has academic departments in the majority of its clinical specialties. There are University and Trust research facilities. The Trust has a research strategy and management framework which aligns its funding for research with the research and innovations activities it supports. Consultants who wish to undertake research require the approval of the Trust R&I Department and relevant ethical approval, and must adhere to the National Framework for Research Governance. The post-holder will participate in clinical trials in paediatric haematology and take on principle investigator roles.

Other Duties as Agreed

The appointee may wish to take on other roles alongside their clinical role. Any positions offered by bodies outside the Trust, (e.g. Training Programme Director, Regional College Advisor, Royal College Representative etc.) must be discussed and agreed by the Head of Service in advance of the position being accepted, so that the impact upon the specialty can be fully considered and any job plan amendments undertaken should the additional role be accepted.

Summary of Main Duties and Responsibilities

- To join the present paediatric oncology/haematology team to facilitate the provision of care for children within the oncology/haematology unit.
- To participate in the EMCYPICS Leukaemia MDT.
- To facilitate the development of regional links within the East Midlands
- To participate in the clinical support for children with bleeding and thrombotic conditions
- To provide clinical and laboratory support to patients with red cell disorders.
- To provide in-patient support for haematological problems occurring in paediatric patients admitted through the medical and surgical paediatric services.
- To provide regional paediatric haematology advice to other paediatricians and neonatologists as well as advice to local GPs.
- To receive referrals for patients with a full range of malignant conditions and a range of non-malignant haematological conditions, agreed between the post holder and the existing paediatric haematologists, and to facilitate their outpatient or inpatient care.
- To provide haematological advice to other teams within the children's hospital as well as paediatricians at linked district general hospitals and general practitioners.
- To take joint responsibility with the other paediatric haematologist for the continuing development of laboratory diagnosis of children with haematological disorders, working closely with colleagues in Haematology.

- To be jointly responsible with the other paediatric haematologist for the laboratory support and advice on all paediatric haematology investigations during normal working hours.
- To develop and promote a specialist area of interest (clinical and/or laboratory)
- To participate in and instigate audit activities within the Hospital relevant to Paediatric Haematology
- To supervise and train junior medical staff.
- To sustain and develop teaching and research in conjunction with the University of Nottingham
- To participate in and fulfil the requirements of the RCPATH CPD scheme.

5 SPECIALTY MEDICAL STAFF

Our team comprises 2 full time paediatric oncologists, one full time haemato-oncologist, 2 full time haematologists and 2 clinical academics with 50% NHS roles. We have 1-2 paediatric middle grade trainees, 2 clinical fellows and a haematology registrar rotating from either Nottingham or Leicester. Junior doctors from the paediatric rota support the ward including a regular ST2 and additional GP trainees or foundation doctors.

6 ADMINISTRATIVE SUPPORT

Office accommodation and administrative support will be provided by the Trust, as will a PC with e-mail and Internet access. All consultants are required to check their hospital e-mail regularly.

7 PROFESSIONAL STANDARDS

The Head of Service is managerially responsible for all activity and personnel in their speciality. They are accountable to a Clinical Director. The Medical Director and Responsible Officer Dr Keith Girling, has overall responsibility for the professional standards of consultants employed by Nottingham University Hospitals NHS Trust.

All consultants are expected to follow the guidelines on practice laid down by the General Medical Council's "Maintaining Good Medical Practice", and are accountable to the Trust for their actions and for the quality of their work. There is annual review of Job Plans and annual Appraisal.

8 ETHICS OF CLINICAL PRACTICE COMMITTEE (ECPC)

The Ethics of Clinical Practice Committee is a source of advice on the ethical principles underlying decisions in healthcare and clinical practice. The committee discusses actual or potential ethical issues arising from the care and treatment of potential, current, or former patients of the Trust. Such issues may arise in the implementation of policies or new initiatives or legal decisions affecting patient treatment and care. The Committee can be contacted via the Trust secretary.

9 CONDITIONS OF SERVICE

The successful candidate will be contracted to Nottingham University Hospitals NHS Trust.

This appointment will be on the terms and conditions of the extant NHS Consultant contract.

The person appointed will be expected to adhere to local policies and procedures and to take note of the standing orders and financial instructions of the Trust. In particular, where the consultant manages employees of the Trust, they will be expected to observe the employment and Human Resource policies and procedures of the Trust.

All employees who have responsibility for other staff need to ensure that individual performance is reviewed and a personal development plan is jointly agreed, at least annually. Managers and Supervisors will work jointly with their staff to ensure all developmental actions that are agreed during the review take place and are evaluated during the following year.

10 RESIDENCE

Because of on-call commitments, the successful candidate is expected to be contactable by telephone and to reside not more than ten miles, or half an hour's travelling time, from their main campus, unless the Trust gives prior, specific approval for a greater distance (or time).

11 HEALTH & SAFETY

The Trust recognises its duties under the relevant Health and Safety at Work legislation: to ensure, as far as reasonably practicable, the health, safety and welfare at work of all its employees. In addition the business of the Trust shall be conducted so as to ensure that patients, relatives, contractors, voluntary workers, visitors and members of the public having access to Trust premises and facilities are not exposed to risks to their health and safety.

All medical and dental staff under contract to the Trust will be expected to be familiar with and adhere to the Health and Safety Policies of the Trust.

ALL accidents must be reported to your Head of Service, and you must submit a completed accident/incident report form and support accident prevention by reporting potential hazards. A copy of the Department's Health and Safety policy will be available to the successful candidate.

Included in these policies is the requirement that all new medical staff will provide evidence that they are not carriers of Hepatitis B before appointment, and accept immunisation if not already immune.

12 REHABILITATION OF OFFENDERS ACT

Because of the nature of the work for which you are applying, this post is exempt from the provisions of Section 4(2) of the Rehabilitation of Offenders Act 1974, by virtue of the Rehabilitation of Offenders Act 1974 (Exceptions) Order 1975. Applicants are therefore not entitled to withhold information about convictions which for other purposes are "spent" under the provision of the Act and, in the event of employment, any failure to disclose such convictions could result in dismissal or disciplinary action by the Trust. Any information given will be completely confidential and will be considered only in relation to an application for positions to which the order applies. If once employed, an employee receives a conviction they are required to inform the Trust.

13 PROTECTION OF CHILDREN, YOUNG PEOPLE AND VULNERABLE ADULTS

In accordance with the requirements of the Safeguarding Vulnerable Groups Act, a check will be made with the Disclosure and Barring Service (DBS) before the appointment can be confirmed.

14 VISITING

Candidates are encouraged to make arrangements to visit the Trust, and should contact the following Consultants in the first instance if they wish to do so:

Dr Jennifer Turnbull Jennifer.turnbull@nuh.nhs.uk 0115 924 9924 ext. 81727

Dr Simone Stokley simone.stokley@nuh.nhs.uk 0115 924 9924 ext. 81727
Dr Sophie Wilne sophie.wilne@nuh.nhs.uk; 0115 924 9924 ext. 84746

Additionally, Consultant applicants are encouraged to visit with a representative of the Chief Executive, as part of the selection process. Their PA, can be contacted on: Tel 0115 924 9924 64978.

NOTTINGHAM AND THE TWO HOSPITAL CAMPUSES

1 NOTTINGHAM

Nottingham is a vibrant and prosperous city with something to for everyone. It has excellent schools and colleges, and two thriving Universities. There are good theatres, an arena which attracts national and international performers, and several renowned arts centres and museums. Nottingham is the home of Trent Bridge Cricket Ground, Nottingham Forest and Notts County Football Clubs, Nottingham Ruby Club, the National Water Sports Centre, the Nottingham Tennis Centre, and Ice Arena.

Set within a county of outstanding natural beauty that includes Sherwood Forest, Wollaton Park, lively market towns and wonderful historic buildings, the city is one of the UK's leading retail centres with a wide choice of restaurants, bars and nightclubs. There is a good network of roads with easy access to the M1 and the A1, the rail service to London (two hours) and other major cities is frequent, and there are numerous international destinations from East Midlands Airport (30 mins) and Birmingham Airport (60mins).

2 THE TRUST

The Trust's services and facilities currently operate on (and from) two main campuses. However, future development and location of our clinical services is continuously reviewed and some services (or parts of services) may relocate to the other campus.

(i) NOTTINGHAM CITY HOSPITAL

Services

Nottingham City Hospital offers a wide range of clinical services to the local population of greater Nottingham and beyond in specialties such as plastic surgery and burns, cardiac and thoracic surgeries, cancer, renal, breast services, urology, stroke services, neurorehabilitation and respiratory medicine.

There is no Accident and Emergency department on this site, though the hospital does take specialist medical and surgical emergency patients referred to its specialties by GPs, our Emergency Department and from other hospitals.

City Hospital has a long association with the city of Nottingham. It first opened in 1903 and the buildings are a mixture of old and new, although services have recently benefited from significant investment in improving the facilities for patients. These developments include the purpose-built Endoscopy Centre, Nottingham Radiotherapy Centre, Nottingham Breast Institute, Nottingham Urology Centre, Trent Cardiac Centre, Short Stay Unit, Centre for Clinical Haematology, PET scanner and Radiotherapy Centre.

Research interests at City Hospital include oncology, respiratory medicine, clinical haematology, rheumatology, diabetes/endocrinology, stroke medicine, urology, and breast cancer. There are academic departments of Haematology, Continuing Care and Anaesthetics.

Educational Facilities

The City Hospital Postgraduate Education Centre provides an excellent educational environment for multi-disciplinary conferences and seminars, postgraduate medical education and continuing medical education, including a Clinical Skills Centre. The Library at in this facility has an extensive section of the University Library which, together with access to national lending and other libraries in the Country, provides a wide range of literature.

Other Facilities

The City Hospital has restaurant and several Coffee City outlets selling hot and cold snacks. There is a cash machine (outside main outpatients).

(ii) QUEEN'S MEDICAL CENTRE

Queen's Medical Centre (QMC) opened in 1978 and is hometo the the University of Nottingham Medical School and School of Nursing and Midwifery.

Clinical services provided at QMC include a very large Emergency Department, Nottingham Children's Hospital and the East Midlands Major Trauma Centre.

Educational Facilities

The Postgraduate Centre at QMC has eleven meeting rooms of varying sizes and audio-visual equipment including video-conferencing, and the Trent Simulation and Clinical Skills Centre, a state-of-the-art simulation centre and clinical skills facility, which opened in April 2004. There are high fidelity simulators (adult and paediatric) with video recording 10 laparoscopic skills stations and an endoscopy simulator. The Greenfield Medical library is situated in the Medical School (NUH medical and dental staff have free access and borrowing rights).

Other Facilities

There are a number of facilities provided at QMC, including a Newsagent/Grocery shop, Costa Coffee, Clothes shop, and a Pharmacy/Chemist's shop. There is a large dining area, Cyber Café, roof garden and an active Doctors' Mess with kitchen, PCs with Internet access, sitting room, billiard table, and television.

3 MANAGEMENT ARRANGEMENTS

Nottingham University Hospitals NHS Trust is managed via a structure of five Clinical Divisions, all of which are cross-town based. These are:

- Medicine
- Cancer & Associated Specialties
- Clinical Support
- Surgery
- Family Health
- There are also the Corporate Departments - including Strategy, Finance, HR, Estates and Facilities and Communications and Engagement

Each Division is led by a Divisional Director, supported by a Divisional Team, and each specialty within that division will have a Head of Service.

4 PARTNER ORGANISATIONS

The Trust works in close association with the University of Nottingham, Nottingham Trent University, the University of Derby and Loughborough University. There are very strong links with nursing and midwifery training, which is part of the University Of Nottingham Faculty Of Medicine, and with the locally-based Schools of Physiotherapy, Radiology and Radiotherapy.
