

SIOP Childhood Cancer Early Diagnosis & Appropriate Referral (CEDAR) Project

INTRODUCTION

The International Society of Pediatric Oncology ([SIOP](#)) is glad to announce the launch of the “SIOP Childhood Cancer Early Diagnosis and Appropriate Referral ([CEDAR](#)) project”, in collaboration with the International Pediatric Association ([IPA](#)). The main objective of CEDAR is to improve the knowledge and understanding of general health care providers, including pediatricians, family practitioners, and community nurses, involved in the initial care, diagnostic workup, and referral of pediatric patients suspected of having cancer.

PRACTICAL ADVICE IN MONTHLY WEBINARS

By providing practical advice from oncology experts from around the world, we aim to improve the outcomes of children and adolescents with cancer in resource-limited settings where delayed diagnosis, misdiagnosis, and underdiagnosis significantly impact cancer-related morbidity and mortality. In the first phase of the CEDAR project, SIOP and IPA are organizing a series of monthly webinars (September 2022 to March 2023) to highlight the importance of early diagnosis, with a focus on the six [WHO](#) index cancers (acute lymphoblastic leukaemia, Hodgkin lymphoma, Burkitt’s lymphoma, Wilms tumour, retinoblastoma, and low-grade glioma). There will also be a discussion session with an international expert panel in each of these webinars.

FREE WEBINARS OPEN TO EVERYONE

These webinars are free to attend and open to everyone. **Each CEDAR webinar is accredited by the European Accreditation Council for Continuing Medical Education (EACCME) with 1 credit point.** The recordings of these meetings will be published on the [SIOP](#) website.

OPENING WEBINAR

Childhood Cancer Early Diagnosis & Appropriate Referral (Webinar Series)

Friday, September 9, 2022

Childhood Cancer Awareness Month

2 -3 PM (UTC)

*Outcomes of Childhood Cancers: Gaps and Disparities to be addressed **

Registration Link: <https://bit.ly/3HV4T86>

Speakers

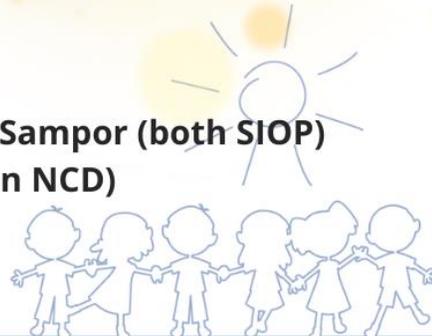

- Prof Kathy Pritchard-Jones, SIOP President
- Dr Liliana Vasquez, SLAOP President, SIOP Cont. President LATAM
- Dr André Ilbawi & Dr Roberta Ortiz, WHO GICC Team
- Dr Eddy Supriyadi, IPA Representative

Moderators

Dr Muhammad Saghir Khan, & Dr Claudia Sampor (both SIOP)
Dr Mychelle Farmer (co-Chair of IPA SAG on NCD)

**This webinar is accredited with 1 CME point by EACCME*

No child should die of cancer: cure for more, care for all

SIOP

The International Society of Paediatric Oncology (SIOP) is the only global multidisciplinary society entirely devoted to pediatric and adolescent cancer. SIOP, as a non-state actor in official relations with WHO, is committed to contribute substantially to WHO Global Initiative for Childhood Cancer. We have over 2,600 members worldwide including doctors, nurses, other healthcare professionals, scientists, and researchers.

Visit siop-online.org for more information.

IPA

The International Pediatric Association (IPA) exists to create a world where all children, regardless of age, location, or family situation can live healthy lives. IPA advocates globally, nationally, and locally for high-quality, evidence-based, and child-centered pediatric care. We are a respected partner of WHO and UNICEF and provide global leadership on emerging child health issues through our work with leading global health players.

Visit ipa-world.org for more information.

SPEAKERS' BIOS

Prof Kathy Pritchard-Jones

Kathy Pritchard-Jones is Professor of Paediatric Oncology, University College London Great Ormond Street Institute of Child Health, London, UK, where she leads clinical and translational research in childhood kidney cancers.

She is President of the International Society of Paediatric Oncology (SIOP) (2019-2022) at a critical time to support the global implementation of the WHO's challenge to double childhood cancer survival rates in Low- and Middle-Income Countries from

~30% to 60% by 2030.

She brings her past experience as medical director for an integrated cancer system of healthcare providers serving a multi-ethnic population of 3.5 million in North London to this leadership role.

Dr Liliana Vásquez

Pediatric oncologist

International Childhood Cancer Consultant, PAHO/WHO

Master of Medical Research, Clinical Research, and Global Child Health

President of the Latin American Society of Pediatric Oncology (SLAOP)

Continental President of the International Society of Pediatric Oncology (SIOP)

Author of papers published in indexed journals on issues of childhood sarcomas, treatment abandonment, diagnostic delays, and global child health.

André ILBAWI, MD

Dr André Ilbawi is a medical doctor, specialized and double-board certified in surgical oncology. Dr Ilbawi joined the World Health Organization in 2015 to advance the cancer Programme and has led the cancer Programme at WHO Headquarters in Geneva, Switzerland.

In his current position, Dr Ilbawi is responsible for implementation of the 2017 World Health Assembly resolution on cancer prevention and control. He was executive editor of the 2020 WHO Report on Cancer and has supported additional WHO publications on broad topics ranging from guidance on cancer prevention to access to cancer health products. Dr Ilbawi also helped develop the WHO/IARC priority setting tool, workforce optimization strategies and other tool to support capacity building. He had led WHO Global Initiative for Childhood Cancer, launched in 2018, and is now being implemented in over 60 countries.

Dr. Eddy Supriyadi, PhD, SpA(K)

Graduated MD, 1989 - Faculty of Medicine UGM Jogjakarta, Indonesia

Pediatrician 2002- Faculty of Medicine UGM Jogjakarta, Indonesia

Pediatric Hematology oncologist 2011 - Faculty of Medicine UGM Jogjakarta, Indonesia

PhD 2012, Vrije University Amsterdam, the Netherlands
